

# Goal: get product on kids vaccine schedule!

Money, money, money. Always funny. In a rich man's world.

My first thought for this write-up is that billionaires and myself have a very different definition of what it means to be rich. Fiat currency burns, and human beings pass. What you do here, now, matters. Please go to the end of this Substack to find out how to be active in stopping the madness by making a public comment by the 7th of June, 2022 [here](#). And thanks to Jonathan and the GAA Coalition for reminding me to remind you about making public comments. **You only have 2 days left!**

I knew this was the end goal for the constant push to creep these experimental products into younger and younger age groups, but I am surprised to see this listed on the ‘vaccine schedule’ so soon. I mean, nothing should surprise me at this point, but I still have a good head on my shoulders so the potential is there. Thank you to James Freeman for bringing this to my attention. Go here for his post on [Twitter](#).

If you head to the [National Health Service](#) (NHS) website you’ll find the following.

Children aged 1 to 15	
Age	Vaccines
1 year	<a href="#">Hib/MenC</a> (1st dose) <a href="#">MMR</a> (1st dose) <a href="#">Pneumococcal (PCV) vaccine</a> (2nd dose) <a href="#">MenB</a> (3rd dose)
2 to 10 years	<a href="#">Flu vaccine</a> (every year)
3 years and 4 months	<a href="#">MMR</a> (2nd dose) <a href="#">4-in-1 pre-school booster</a>
5 to 15 years	<a href="#">COVID-19 vaccine</a> (1st and 2nd dose)
12 to 13 years	<a href="#">HPV vaccine</a>
14 years	<a href="#">3-in-1 teenage booster</a> <a href="#">MenACWY</a>

<https://www.nhs.uk/conditions/vaccinations/nhs-vaccinations-and-when-to-have-them/>

Did you guys know that if you successfully get a vaccine on the schedule your yearly profit is in the billions? That’s billions. With a ‘b’. But health, right?

By the way, the NHS are ‘here for you’.

## “We’re here for you”

Helping you take control of your health and wellbeing.

They really are! They are ‘here’ to enable you becoming a digital slave. Let me ask you something, what does a COVID Pass have to do with anything related to the health of a human being? And why is Vitamin D and healthy lifestyle NEVER mentioned on these websites for these organizations with the word ‘health’ in their very name? Pretty fast and loose with that word ‘health’, aren’t you?

### Coronavirus (COVID-19)

Get the latest [advice about COVID-19](#), including information about symptoms, vaccination, [NHS COVID Pass](#), and what to do if you have or might have COVID-19.

On the 15th of June, there will be another VRBPAC meeting to ‘discuss’ injecting infants 6 months to 4 years. I will speak again. Stay tuned. There are 1866 adverse event reports in VAERS for [infants 0-5](#) so far (with URF 10 = 18,660) with the most frequently reported adverse event being ‘Incorrect dose administered’.

I forgot to mention that *you can participate* by written comment or speaking at the upcoming [VRBPAC meeting](#) concerning injecting infants ages 0-4. Scroll down for details on how to be active.

#### Public Participation Information

Interested persons may present data, information, or views, orally or in writing, on issues pending before the committee. FDA is establishing a docket for public comment on this meeting.

#### The Docket Number is FDA-2022-N-0904

The electronic filing system will accept comments until 11:59 p.m. ET at the end of June 13, 2022. Comments received by mail/hand delivery/courier (for written/paper submissions) will be considered timely if they are received on or before that date.

Comments received on or before June 7, 2022, will be provided to the committee. Comments received after June 7, 2022, and by June 13, 2022, will be taken into consideration by FDA. In the event that the meeting is cancelled, FDA will continue to evaluate any relevant applications or information, and consider any comments submitted to the docket, as appropriate.

I just thought you guys should know. Coming to a country near you.

Here’s Steve’s new [video](#).

#### I don't know what to say...

The results are in for the 'Efficacy' (uh, safety is a better word) of the mod-e-RNA shots.
